17% sporozoites were isolated from salivary glands of
infected Anospheles stephensi mosquitoes and purified over
a DB52 cellulose column. The sporozoites were cultured for
24h at 37c in the presence of $$ CO2 and 10% FBS as
described in Transformation of sporozoites into early
excerythrocytic malaria parasites does not require host
cells (U Exp Med. (2003)197 (8):1045-50; mRNA was
extracted using the Invitrogen microFAST TRACK kit and
used for cDNA construction via the BDBiosciences SMART
cDNA synthesis kit. Double stranded cDNA was cloned into a
plasmid vector using Invitrogen's TOPO TA vector cloning
kit."
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             .,

Sequence 26, Application US/10055001A

Sequence 26, Application US/10055001A

Publication No. US20030049835A1

GENERAL INFORMATION:
APPLICANT: Wesley, Susan V.
APPLICANT: Welly Christopher A.
TITLE OF INVENTION: Weind and means for producing efficient silencing constructs
TITLE OF INVENTION: using recombinational cloning
CURRENT APPLICATION NUMBER: US/10/055,001A

CURRENT PILING DATE: 202-06-11

NUMBER OF SEQ ID NOS: 26

SOFTWARE: PatentIn version 3.1
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    13119
